

Hady Ahmed Abd El-salam

Mobile Developer • Cairo, Egypt • Military Service Status : Completed • (+20) 1018314139 • hadyahmed5000@gmail.com • LinkedIn • GitHub

Summary

Mobile Developer with 2+ years of experience specializing in Android and Flutter development. Proven track record of building scalable mobile applications with clean architecture principles. Demonstrated expertise in Kotlin, Jetpack Compose, and modern Android development practices. Strong foundation in software engineering with a bachelor's degree in Computer Science and a passion for creating exceptional user experiences.

EXPERIENCE

Mobile Developer • Ibnsina Pharma

Jan 2024 – Currently

- Developed and maintained cross-platform applications using Android (Kotlin) and Flutter, delivering scalable solutions across multiple projects.
- Architected and implemented MVVM/MVI design patterns to ensure maintainable, testable codebases with clear separation of concerns.
- Established CI/CD pipelines to automate build, test, and deployment processes, reducing release cycles and improving code quality.
- Enhanced application performance through profiling, optimization, and implementation of Android best practices including Jetpack Compose, Material Design, and modern architecture components.

EDUCATION

Ain Shams University - Computer and Information Sciences

Bachelor's degree • GPA 3.6 (with Honors) • Ranked 5th in Computer Science department.

Aug 2019 – Jul 2023

PROJECTS

Ibnsina Pharma App

Contributed to the design and development of an enterprise B2B pharmaceutical application, implementing multi-gateway payment integration (Stryve, SuperPayCard) with WebView, establishing CI/CD pipelines, and enabling over-the-air updates using Shorebird for instant deployments without app store releases.

Flutter • Dart • CI/CD • Shorebird (OTA Updates) • Payment Gateways • WebView • Firebase • BLoC • Clean Architecture

Ibnsina Pharma TMS

Contribute to the design and development of a delivery management application using Clean Architecture and MVI pattern, featuring real-time trip tracking, barcode scanning, thermal printing, and GPS-based delivery verification with offline-first data synchronization.

Android • Kotlin • Room Database • Firebase • AWS S3 • CameraX • ML Kit • SignalR • WorkManager • Clean Architecture • REST APIs

Asset Tracking App

Developed an enterprise Android application for pharmaceutical asset management using Clean Architecture (MVVM), featuring offline-first functionality with Room database caching, real-time synchronization via SignalR, and hardware barcode scanner integration (Honeywell).

Android • Kotlin • Room Database • Firebase • AWS S3 • CameraX • ML Kit • SignalR • WorkManager • Clean Architecture • REST APIs

Leaf App — Graduation Project

Played a pivotal role in the development of Leaf App, an innovative tool for plant disease detection utilizing deep learning:

- Designed and implemented a (AI) Artificial Intelligence deep learning model for disease detection, achieving 97% accuracy.
- Created a user-friendly interface using XML to enhance accessibility.
- Integrated the application seamlessly with the underlying deep learning model.

Android • Kotlin • Java • Python • Room database • Firebase

Location Reminder *

Developed an application using Google Maps SDK and geofencing technology, enabling users to save locations and receive timely notifications based on geographical proximity.

Android • Kotlin • Room database • Firebase • Google Map • Geofences

Licenses & certifications

- **Advanced Android Kotlin Development** (Nanodegree Program from **Udacity**)
- **Developing Mobile Applications for Android using Java** (ITI)
- **Foundations of User Experience (UX) Design** (Google)
- **Course on Python** (Google)

💡 *See more [certifications](#)*

ACHIEVEMENTS & AWARDS

- 1st Place **Android** App in FCIS-ASU's Support Workshop computation in Summer'20.
- **2nd Place** in **(NLP) Natural Language Processing Final Project Computation.**
- **52nd Place** in **ICPC Ain Shams FCI Collegiate Programming Contest .**

💡 *See more [achievements](#)*

EXTRACURRICULAR ACTIVITIES

DELL-AI Empower Egypt Hackathon — Engaged in a hackathon hosted by Dell, focusing on AI applications and solutions.

Android Workshop — Participated in an Android workshop facilitated by FCIS-ASU's Support Activity, gaining hands-on experience and insights into Android development.

Vue.js Workshop — Attended a workshop on Vue.js organized by OSC Student Activity at FCIS-ASU, expanding knowledge and proficiency in front-end development.

Problem Solving Training — Participated in the level 1 Training at ACM Student Chapter, FCIS-ASU, honing problem-solving skills and fostering a deeper understanding of algorithmic approaches.

SKILLS

LANGUAGES & TECHNOLOGIES

Java • Kotlin • Dart • C# • Python • C++ •
HTML5 • CSS3 • JavaScript • SQL • SQLint

LIBRARIES & FRAMEWORKS

Flutter • Vue.JS • Room Dataset • API •
Retrofit • Moshi.

TOOLS & PLATFORMS

Git/GitHub • Firebase • Databases • Figma • Adobe

Creative Cloud • Android Studio

INDUSTRY KNOWLEDGE

UI/UX • Design Patterns • Deep Learning • Machine
Learning • Data Structures • Networking • socket
programming • Algorithms • Testing • NLP • Software
Engineering

LANGUAGES

Arabic • English

INTERESTS

Graphic Design • Branding • Story Tellin
